

# CCHER REACHUS Diabetes Initiative

2008

## A Summary of Results

*This document will review the population surveyed, the major trends and findings, and provide recommendations for future initiatives.*

## Population Captured

The data presented is based on fifty-four surveys collected from people living with diabetes in the Haitian community of Boston. Data was collected between May 15 and June 30, 2008. Of the respondents, 76% were female and 24% were male. Ninety-two percent of those surveyed were fifty or older. None of the surveyed group was born in the United States.
